Axxess' Palliative Care Solution Awarded ACHC Product Certification

Full Suite of Axxess Solutions Meets ACHC Standards

DALLAS, August 2, 2023 – After a thorough audit of its standalone palliative care software, [Axxess' full suite of solutions has now earned ACHC Product Certification](#). Axxess' solutions for the care at home industry include software for home health, home care, hospice and palliative care organizations.

The Accreditation Commission for Health Care, Inc. (ACHC) offers product certification based on a comprehensive evaluation of the product's ability to meet ACHC standards in administration, operations, fiscal management, human resources, provision of care, quality assurance/performance improvement and risk management.

As soon as ACHC Product Certification was available for palliative care, Axxess participated in a rigorous survey similar to the surveys provider organizations experience. The survey evaluated Axxess Palliative Care in its ability to meet software requirements for each ACHC standard.

"Axxess added to their list of ACHC achievements with the certification of their EMR for use in palliative care," said Matt Hughes, ACHC Vice President, Corporate Strategy. "They were well prepared for a comprehensive review of the product and continue to showcase their commitment to excellence, relevant product development and continuous product improvement."

ACHC Product Certification demonstrates Axxess' compliance with ACHC's accreditation standards and commitment to operational excellence, patient safety and quality care.

"We are proud to have our entire suite of solutions recognized with ACHC Product

Certification,” said Tammy Ross, Senior Vice President of Professional Services at Axxess. “Our solutions are built for clinicians by clinicians, and this recognition is a testament to the hard work and knowledge of our team. Our clients can be confident that their technology partner is helping them meet the highest regulatory and quality standards.”

###
